

2018 Research Administrative Support Guidelines

Background

The TCRN is committed to supporting its members in obtaining competitive grant funding. In 2018, the TCRN is offering support to assist with the administrative efforts in compiling an application to the following funding bodies and grant schemes:

- NHMRC Project Grants
- NHMRC Fellowships (Research, Early Career, Career Development Fellowships)
- ARC Discovery Projects and ARC Discovery Early Career Researcher Awards
- Other Category 1 or 2 funding bodies with appropriate justification

A TCRN appointed Project Officer will assist with a number of administrative/project related tasks including the completion of CV profiles with RGMS (or equivalent grants management system), organising meetings/teleconferences between collaborators and proof reading of the grant application. Support will be available until the end of February/beginning of March.

Who is eligible?

Any member of the TCRN is eligible to apply and they must be named as CI-A on the grant application. A list of current members can be found [here](#). The other Chief Investigators may be from other organisations including other TCRCs. Collaborations between TCRCs are encouraged.

How to apply:

Applicants should complete the short application form and submit to tcrn@unsw.edu.au by the due date. Late applications will not be accepted.

Review:

Applications for research administrative support will not be reviewed by the TCRN. The TCRN will convene an independent panel to assess the applications and rank based upon strength of the intended research and track record of applicants. Applicants will be advised of support available in late January.

Please note: UNSW applicants must submit their applications via the Grants Management Office by the internally set deadlines. This support will not duplicate the support provided by Research Services and is intended to compliment. Applicants from other TCRN member groups should also adhere to the guidelines for submission set by their organisation.
